# KOI FOODS

## Pro-line Aqua Wheat Germ

G

**Proline AQUA Wheatgerm** Koi food is recommended for use in the cold months. Therefore, especially in early spring and autumn, when digestion and metabolism is slower. This food is extremely easy to digest, so it keeps the flow in the intestines of your fish going. This significantly reduces the risk of congestion (constipation) and infections. During these cold periods, the fish must build up an energy supply as they enter or leave the winter. Other features: stimulates immunity, contains prebiotics and probiotics to improve the intestinal flora.

Composition: fish meal. wheat. dehulled toasted soya meal. wheat germ. wheat gluten. fish oil. yeast. krill meal. antioxidants.

**Analysis:**  
 Protein 37.00%, Fat 6.00%, Dietary Fiber 2.30%, Ash 9.2%, Moisture 7%, Carbohydrates 29% (of which sugars approx. 2.2 grams), Phosphorus 1.3%, Calcium 1.7%, Sodium 0.3.  
**Vitamin:**  
 A - 25,100 IU(IE)kg, D3 - 2,480 IU(IE)kg, E - 200 mg/kg, C - 330 mg/kg

## Pro-line Aqua Koi Treats

G

### SILKWORK PUPAE

48%  
PROTEIN

**Proline Aqua silkworm pupae** are an excellent and powerful supplementary feed for koi. The highest quality silkworm pupae is specially dried out to retain all the goodness with no additives or preservatives included. Silkworm pupae can be fed as a daily 'treat' or as a supplement to the normal diet (about 30% of total food volume). Due to the high protein and fat content values, it is recommended not to feed below temperatures of 15C/59F. To improve the digestion ability of your koi further, put the pupae in warm water for half an hour before use.

**Composition:** 100% Dried Silkworm **Analysis:** Crude Protein 48% Crude Oils & Fats 28% Crude Fibres 2% Crude Ash 4%

### BLACK SOLDIER FLY LARVAE

43%  
PROTEIN

**Proline Aqua BSF (Black Soldier Fly Larvae)** is a very versatile animal food that is very suited to a Koi's diet. It contains a lot of calcium, which is good for the skeleton structure of your fast-growing Koi, it contains many amino acids that cannot be produced by Koi themselves, but are essential. **Analysis:** Protein 43%, Fat 36%, Calcium 5%, Ash 4.6%, Moisture 8%.

Vitamin C also enhances the shine of the skin. It also contains Medicarp Color Enhancer Vitamin E, which helps reduce stress and vitality of Koi and energy support.

# KOI FOODS

## JPD - Shori

L

### High Growth

All ingredients in this food are selected carefully with dietetic studies and JPD technology. This food is formulated with high quality fish and plant protein which make a good digestibility for koi. It should be noted that this food is high protein (45%) but also low ash (8.5%). The ash is digested slowly. This is because high protein fish meal is used.

### Color Enhance

Astaxanthin makes red redder and vitamin C makes white whiter. These ingredients make a shiny beautiful body. This food is enriched with astaxanthin.

### Reduces The Waste

This food is formulated with probiotics which reduces the waste in the water and regulate the functions of the intestines. And this food doesn't deprave the water quality, because this pellet keeps shape for long time in the water.

## Kiyomizu - Life stage food

Kiyomizu Junior 7kg (4.5mm)	KF106	85.45
Kiyomizu Adult 7kg (6mm)	KF107	85.45
Kiyomizu Jumbo 7kg (8mm)	KF108	85.45
Kiyomizu Junior 14kg (4.5mm)	KF106L	139.45
Kiyomizu Adult 14kg (6mm)	KF107L	139.45
Kiyomizu Jumbo 14kg (8mm)	KF108L	139.45
Kiyomizu Sinking 9kg (4.5mm) NEW	KF109s	POA
Kiyomizu Sinking 18kg (4.5mm) NEW	KF110s	POA
Kiyomizu Sinking 9kg (6mm) NEW	KF111s	POA
Kiyomizu Sinking 18kg (6mm) NEW	KF112s	POA

The size of **Kiyomizu** pellets is designed to suit the 'target audience'. If the pond contains Koi of different sizes, we recommend starting with the largest pellets and waiting until the bigger Koi have started feeding before introducing the smaller pellets. Feed once to three times a day. Do not feed the fish more than they eat in five minutes. Remove any uneaten feed. When the water temperature is less than 10°C, Koi have a reduced appetite and slow digestion and should be fed accordingly. **\*Do not feed Koi if the water temperature drops below 5°C.\***

### Kiyomizu consists of:

- BIO-MOS® (mannan oligosaccharides)
- organic trace elements
- astaxanthin
- easily digestible protein
- prebiotics and probiotics
- organically bonded vitamins and minerals
- special algae products - essential for the production of Omega 3
- Montmorillonite clay (bentonite)
- yeast extracts
- ingredients to improve digestion

### KIYOMIZU JUNIOR - 4.5 mm for Koi up to 35 cm

Junior Koi need a good start in life if they are to grow into magnificent Jumbo Koi. They need easily digestible proteins to grow. They also need vitamins and minerals to develop a good body and bone structure. Balanced, health-supporting and immunity-boosting ingredients are also required. Kiyomizu Junior provides exactly what young Koi need.

### KIYOMIZU ADULT - 6 mm for Koi from 35-60 cm

Adult Koi grow more slowly and start to develop their body shape and colour. It is therefore essential to change their feed, making sure they are given the ingredients they need for this stage of life. Kiyomizu Adult contains prebiotics and probiotics to strengthen the health and vitality of Koi.

### KIYOMIZU JUMBO - 8 mm for Koi from 60 cm

Jumbo Koi need to maintain and improve their body shape and colour. In addition, they can live to an old age and therefore have to remain healthy. Giving them large amounts of protein does not make them grow more quickly. In fact, it has the exact opposite effect. Jumbo Koi need smaller amounts of very easily digestible proteins of the highest quality. Combined with optimum support for their health and colour, it is possible that they reach their maximum genetically determined length and old age.

### KIYOMIZU SINKING - 4.5mm & 6mm pellet sizes

Kiyomizu Sinking pellet is the perfect recipe for a sinking pellet with minimum waste. This food is available in 9kg or 18kg.

**KIYOMIZU**  
Life stage koi food

## Kusuri - Premium

R

Kusuri Premium 15kg Medium	KF070	167.40
Kusuri Premium 5kg Medium (Pouch)	KF073	68.53
Kusuri Premium 1.5kg Medium	KF075	34.83
Kusuri Premium 650g Med	KF077	20.22

**Kusuri Premium Koi Food** is the most popular food in the Kusuri range. A very high quality, immune enhancing, food for Koi. We have formulated our food to provide the correct balance of ingredients for Koi. Kusuri Products are the only manufacturer to include Kusuri Klay in their researched food. Exeter University Biology Department, 18 years ago, discovered that the addition of Kusuri Klay removed stress proteins from the digestive tract. Stress proteins come from feeding food that contains airborne spores of Fungi and Algae. This subsequently inhibits the fish's ability to absorb and digest food efficiently, this can lead to poor growth and health.

**Kusuri Klay has the effect of cleansing the digestive tract, allowing the high quality ingredients to be absorbed, keeping your fish happy and healthy.**

**Key benefits include:**

Garlic to reduce parasitic infestations.  
Kusuri Klay for better digestion of up to 22%.  
Spirulina, Shrimp Meal and natural Astaxanthin to improve colour.

## Kusuri - Growth

R

Kusuri Growth 15kg	KF081	222.45
Kusuri Growth 5kg (Pouch)	KF0821	93.25
Kusuri Growth 1.5kg	KF083	37.08
Kusuri Growth 650g	KF084	22.47

**Kusuri Growth complete food** for Koi Carp contains the highest quality proteins to promote rapid growth, without the risk of any build up of fat deposits inside the body of the fish. Kusuri Growth provides a precise blend of lipids and other vital nutritional ingredients, to promote both rapid growth and good body shape. Feed Kusuri exclusively for best results. For best results when feeding larger Koi (3 years and older) Kusuri Growth can be mixed with Premium, Multiseason, Supersilk-20 or Kolor.

**Basic Analysis:**

Trace Elements: E1 Iron 133mg, E2 Iodine 3mg, E4 Copper 20mg, E5 Manganese 47mg, E6 Zinc 278mg.  
Antioxidants: E310 Propyl gallate 1mg, E320 BHA 2mg, E321 BHT 63mg.  
Vitamins: E671 Vitamin D3 1500IU, E672 Vitamin A 4000IU.

**Analytical Constituents:**

Extruded blend of Crude Oils & Fats 12%, Crude Protein 37.9%, Crude Ash 9.5%, Crude Fibre 1.5%, Moisture 8%, Calcium 1.8%, Phosphorus 0.8%, Sodium 0.3%.

# KOI FOODS

## Kusuri - Multi-Season

R

Kusuri Multi-season 15kg	KF085	222.45
Kusuri Multi-season 5kg (Pouch)	KF0861	92.13
Kusuri Multi-season 1.5kg	KF087	37.08
Kusuri Multi-season 650g	KF088	22.47

**Multiseason** is a very special recipe acknowledged as having the ultimate ingredients for feeding to produce excellent growth and colour improvements in koi. You will discover that feeding little and often will produce very low levels of fish waste. Multiseason can be mixed with any of the other foods in the Kusuri range.

## Kusuri - Staple

R

Kusuri Staple 5kg Medium (Pouch)	KF0891	56.18
----------------------------------	--------	-------

**Kusuri Staple Ornamental Food** is a high quality floating pellet food, containing all of the necessary ingredients for healthy cold water fish including Koi. This food can be mixed with any of the Kusuri food range, to vary the diet of your fish.

## Kusuri - Kolor

R

Kusuri Kolor 15kg	KF0841	222.45
Kusuri Kolor 5kg (pouch)	KF0843	92.13

**Kolor food for Koi Carp** is a 6mm floating food containing the highest quality proteins and ingredients to improve the depth and colour of your Koi. Kusuri Kolor is specially formulated with Paprika and Spirulina to naturally promote excellent colour depth in your Koi. With Wheatgerm, Soya and fish meals, this 35% protein food can be fed down to 10°C. At higher temperatures above 20°C this food can be mixed with other foods from the Kusuri range to maximise and promote good growth as well as colour. Feed Kusuri exclusively for best results.

## Kusuri - Sinking

R

Kusuri Sinking Pellet 15kg	KF090	167.40
Kusuri Sinking Pellet 5kg (Pouch)	KF0911	67.41
Kusuri Sinking Pellet 2.5kg	KF092	39.32
Kusuri Sinking Pellet 650g	KF093	20.22

**Kusuri Sinking Ornamental Food** is an all-season formula, and is suitable for a wide variety of species with bottom and surface feeding behavior, including Sturgeon, Koi Carp, Starlets, Tench and Goldfish. This sinking pellet has been prepared using special temperature cooking and 'expander' technology. This helps gelatinise the starch present in the food, rendering it more digestible for all pond fish. As a result the pellet is very dense; this high density allows the pellet to sink slowly through the water column, making it perfect for surface feeders during the colder months when they tend to feed in the lower areas of the pond.

Sinking Pellet formula provides a full everyday diet deriving proteins from fish meal and from vegetable origins. A balanced Vitamin and Mineral supplement which will meet all the needs for good growth, whilst maintaining optimum health and vitality. Sinking Pellet Food also contains a number of special ingredients to promote health and help reduce stress. These ingredients include purified Beta 1,3 /1,6 glucans, which is an immuno-stimulant enhancing production of white cells to kill off invading bacteria.

# KOI FOODS

## Kusuri - Wheatgerm

R

Kusuri Wheatgerm 15kg Medium	KF095	167.40
Kusuri Wheatgerm 5kg Medium (pouch)	KF0972	67.41
Kusuri Wheatgerm 1.5kg Medium	KF098	34.83
Kusuri Wheatgerm 650g Medium	KF099	20.22

Kusuri Wheatgerm Koi Food formula contains the high nutrient ingredients included in the Premium formula, plus increased Wheatgerm extract. Kusuri Wheatgerm feed can be fed at any time, but is particularly popular during autumn, winter and early spring periods when pond water temperatures are low and a reduced feeding protocol is usually adopted. This food is ideal as a transitional food when coming in to the next season of a higher protein food or when winding down during the Autumn. (Between 10°C – 14°C) Mix Kusuri Wheatgerm with Kusuri Premium, Kusuri Sinking or Kusuri Multiseason over a 4 week period for this purpose.

Feeding Instructions: Feed this complete food sparingly, (once per week), below 10°C (50°F). Only feed what is consumed within 10 minutes. Do not overfeed. Remove any uneaten pellets after this time elapses to avoid polluting the water. Never feed rancid food. Soaking pellets in water or fruit juice can aid better digestion. Kusuri Wheatgerm is suitable for all feeding temperatures. Kusuri recommend all food packaging is kept sealed at all times and stored in a cool dry environment.

## Kusuri - Super-Silk 20

R

Kusuri Super-Silk 20 1.5kg	KF103	37.08
Kusuri Super-Silk 20 5kg (pouch)	KF1041	92.13
Kusuri Super-Silk 20 15kg	KF105	222.45

Supersilk-20 is a very special recipe including 20% Silkworm Pupae. Silkworm protein is acknowledged by Japanese breeders as the ultimate ingredient for feeding and for colour improvement of Koi, Silkworm pupae have a unique type of protein and silk oil properties that koi can digest easily. With all of the Premium food properties, plus added Silkworm pupae ingredients, this food is ideal for any koi pond. With 38% protein properties we advise feeding down to 15°C with no adverse effects, and reduced down to little feeding at 12°C. **Supersilk-20 can be mixed with Multiseason for minimal waste, superb growth, and excellent colour enhancement for your koi.**

## Koi Treats - Garlic & Orange **NEW**

P

850g INSECT LARVAE SHAPED GARLIC TREATS	KF204	19.98
850g ORANGE FLAVOUR KOI PELLETS	KF205	19.98
